

TABLE OF CONTENTS	PAGE
PREFACE	1
RESEARCH REPORTS	
Germination of <u>Vavilovia formosa</u> (Stev.) Davis in the laboratory. S.R. Cooper and Caroline A. Cadger	5
Internode length in <u>Pisum</u> . Genotypes <u>la cry^s lka</u> and <u>la cry^s lkb</u> and the phenotype semi-erectoides. R.E. Cramp and J.B. Reid	6
Effect of heat shock on the expression of disease resistance response genes in pea. Catherine H. Daniels and Lee A. Hadwiger	12
The mode of inheritance of somaclonal variations in pea dealing with flowering behaviour. T.A. Ezhova, A.M. Bagrova and S.A. Gostimski	15
Agronomic performance and background effects of the afile-tendrilled acacia pea foliage type: evaluation on wire trellises. I.L. Goldman and E.T. Gritton	18
Regeneration of pea genotypes following exposure to sub-lethal high temperatures. W. Gottschalk	21
Shortened internode length below the node of flower initiation in pea. F.N. Green	22
Orange pod phenotype found in an accession of <u>Pisum fulvum</u> Sibth. & Sm. originating from Syria. F.N. Green	25
Evidence for a new rugosus locus. C.L. Hedley, D.A. Jones, T.L. Wang, M.J. Ambrose, A.M. Smith, T.H.N. Ellis, L. Turner, P. Matthews, M. Bhattacharyya, W. Harwood, I.D. Bedford and F.N. Green	26
Variations in pod rehydration and permeability in three lines of <u>Pisum sativum</u> L. Simon N. Miles, David Price, Maria E. Donkin and Iain Swadling	29
Water congestion damage in pea: reduced susceptibility in the small stipule mutant, <u>st</u> . Ian C. Murfet	32
The <u>gi</u> locus shows linkage with <u>gp</u> , <u>r</u> and <u>tl</u> . Ian C. Murfet	38
Evidence of maternal transmission of plastid DNA in the garden pea. N.O. Polans, J.L. Corriveau and A.W. Coleman	41
Evidence of a cluster of linked genes for resistance to pea seedborn mosaic virus and clover yellow vein virus on chromosome 6. R. Provvidenti and F.J. Muehlbauer	43
Genetic impact of the pea seedborne mosaic virus eradication program on the U.S.A. national <u>Pisum</u> collection. B.E. Recchio-Demmin, J.R. McFerson and S. Kresovich	46
Internode length in <u>Pisum</u> . The genotype of Gottschalk's mutant 84B. J.B. Reid	48

Internode length in <u>Pisum</u> . The interaction of genes <u>lv</u> and <u>lk</u> . J.B. Reid	50
Mapping of a legumin subunit gene on pea chromosome 7. O.G. Smirnova	52
Purified guard cell protoplasts from the leaf epidermis of the <u>argenteum</u> mutant of <u>Pisum sativum</u> . S. Smith, J.D.B. Weyers, P.C. Jewer and H- O. Högländ	55
Two new anthocyanin genes in the <u>D</u> segment of chromosome 1. W.K. Swiecicki	59
Is the locus for the gene <u>het</u> on chromosome 7 or 5? A new look at Lamprecht's linkage groups. W.K. Swiecicki	62
Linkage of a gene conferring toothed leaves. W.K. Swiecicki	64
Locus and allelism tests for the <u>pet</u> and <u>apu</u> mutants. W.K. Swiecicki ..	66
Locus for the gene <u>def</u> (development funiculus). W.K. Swiecicki and B. Wolko	67
A leghemoglobin gene cluster is located near <u>D</u> on chromosome 1 N.F. Weeden	69
Additional markers for chromosome 6. B. Wolko and N.F. Weeden	71
Two new isozyme loci on chromosome 2. B. Wolko and N.F. Weeden	75
REVIEW	
Flowering genes in pea and their use in breeding. Ian C. Murfet	78
FEATURES	
The John Innes pea program for the '90s. D.R. Davies	87
The European Community Pea Group. C.L. Hedley	88
The Norwich Legume Group (NORLEG). C.L. Hedley	89
Field pea breeding in Poland. W.K. Swiecicki and K. Leraczyk	92
PISUM GERmplasm	
European <u>Pisum</u> database. P. Matthews and W. Swiecicki	96
Collection of <u>Pisum</u> germplasm in Turkey in 1985 and 1989. F.J. Muehlbauer, W.J. Kaiser, Ziya Kutlu, and C.R. Sperling	97
pGene: a <u>Pisum</u> gene database. P.J. Winfield	99
BIBLIOGRAPHY	
The use of pea to study the plant genetics of symbiotic nitrogen fixation. T.A. LaRue	101
ERRATA	104
